Concepts: SDLC, Frontend & Backend Integration, Data Analysis, Market Research, Agile Collaboration

Soft Skills: Problem Solving, Analytical Thinking, Attention to Detail, Team Collaboration, Client Communication, Project Management

EXPERIENCE

Data Analyst & Market Research Intern | *Movidu Technology (BDE)* Nov 2024 - Sept 2025

- Performed data verification and quality checks on CRM datasets across Zoho CRM, HubSpot, and Salesforce, ensuring accuracy of records used for reporting.
- Tracked daily task completion and key performance indicators (KPIs), providing individual status updates to stakeholders in line with defined targets.
- Followed structured research procedures and documentation guidelines to compile accurate, compliant reports for cross-functional teams.
- Captured, reported, and escalated data discrepancies and process issues promptly to relevant stakeholders.

Web Development Intern | *Techvanto Academy* Jun 2024 - Jul 2024

- Completed structured, instruction-based training modules covering frontend and backend development, adhering closely to defined project guidelines.
- Built and tested project deliverables against specified requirements, maintaining consistency and quality across submissions.

Student Intern | *1Stop.ai* Dec 2022 - Jan 2023

- Gained hands-on exposure to the Software Development Life Cycle (SDLC), including quality checks, verification steps, and documentation practices.
- Built and validated interface and backend components against provided specifications and instructions.

PROJECTS

Vedic Astrology Consultation Platform Feb 2026 - Mar 2026

- Developed a responsive web platform for astrology and Vastu consultancy services using HTML5, CSS3, JavaScript, and Bootstrap.
- Implemented service listings, tiered pricing plans, client testimonials, product catalog, and course modules.

EKlorix - EdTech & Career Consultancy Platform Dec 2025 - Feb 2026

- Built an EdTech platform integrating career development services with HTML5, CSS3, JavaScript, and Bootstrap.
- Designed an AI-powered resume builder, job matching engine, and career assessment modules to improve user engagement.

LPU EVS - E-Rickshaw Booking Platform Aug 2024 - Nov 2024

- Developed a full-stack e-rickshaw booking platform with real-time seat availability tracking.
- Implemented backend logic and database using PHP, MySQL, and XAMPP, with a responsive frontend built in HTML5, CSS3, Bootstrap, and JavaScript.

OCR-to-Document Converter Jan 2023 - Mar 2023

- Built a text-to-handwriting converter with custom font rendering and QR code sharing using Python, OpenCV, and Pillow.
- Developed the user interface with JavaScript and Bootstrap for an end-to-end document conversion workflow.

Home Interior Design Website Jan 2022 - Feb 2023

- Developed a booking platform for customized room and office interior design services using HTML, CSS, JavaScript, and Bootstrap.
- Enabled direct communication workflows between clients and design teams.
